## Swissbau promises good development opportunities for ATMOVA in 2010

ATMOVA, the energy delivery solution with an eye to aesthetics and design, was able to benefit from its presence at the Basle Swissbau, the leading trade show for construction and real estate in Switzerland, to increase its name and product recognition. Nearly 110,000 visitors had the opportunity to closely scrutinize the ATMOVA system and get information on its advantages. In particular, trade professionals showed great interest in the efficient and forward-looking ATMOVA solution.

“We are extremely pleased with our performance here. Architects, planners, institutional builders and hoteliers as well as a multitude of private visitors took home with them a very positive impression of the ATMOVA system. We were able to make exceptional contacts from all areas at this very important regional trade show,” summed up Mrs. Petra Dietrich, Head of Marketing of Swissmetal Design Solutions AG. “ATMOVA’s success at Swissbau encourages us to present it again in this form two years from now as a integral part of the trade show calendar.”

Founded in 2007 as a subsidiary of Swissmetal, Swissmetal Design Solutions AG develops and distributes a novel form of energy extraction. ATMOVA offers architecturally appealing roof and façade elements in an adjustable total system which integrates in already existing roof and facade constructions in a seamless fashion. In this way, ATMOVA combines aesthetics and modern heat extraction as a renewable energy. The positive physical characteristics of a special copper alloy make it possible for ATMOVA system to make energy from the environment available and to use a heat pump for heating and hot water for buildings (for additional information on ATMOVA, please see [www.atmova.ch](http://www.atmova.ch)).

Swissmetal produces and sells worldwide high-quality special products made of copper and copper alloys which are mainly used in the electronics, telecommunications, air travel, petroleum, automobile, stationery and watch/clock industries and in the architectural sector. In financial year 2007, Swissmetal achieved turnover of CHF 407.0 million. As at end of December 2009, the company had 629 full time-employees. Swissmetal, with its registered office in Dornach (Switzerland) is quoted on the SIX Swiss Exchange as Swissmetal Holding Ltd.
